Battle Cats Ultimate for Androids Page 2 Battle Cats Ultimate for Androids It is possible to continue to play your saved data for "The Battle Cats" on a different device by using the Save Data Transfer service. * The Save Data Transfer can transfer save data across all supported platforms, e.g. Android to iOS (iPhone, iPod Touch, iPad) and vice versa. You must be signed into your Google account to be able to use the Save Data Transfer service. [1] Configuring your old device (source device for save data) [2] Configuring your new device (destination device for save data) [Before you begin the Save Data Transfer] ※Please record the Inquiry Code found on both your Title Screen and Settings Menu (screenshot as well!) ※Do not attempt to start or resume a Save Data Transfer in a location with poor network reception. ※Be aware that data currently on your target device will be overwritten after Resuming a Data Transfer. ※Data from Transfers that are not resumed within 3 months will be invalidated. ※Without a properly recorded Transfer Code and Confirmation Code pair to input, you will not be able to continue the Data Transfer to your new device. Make sure that all digits are correctly recorded and that you have taken a screen capture of the codes to ensure that you are able to retrieve your save files. ※ PONOS will not assume responsibility for data lost due to network error, device error, or user error, and cannot provide a guarantee that data will be transferred without error. ※ Data from the English version of the Battle Cats cannot be transferred to other language versions of the game. ※ Please tap the button only once when starting or resuming Data Transfers to avoid error. ※ Once a transfer to a new device has been completed, the original data on other devices will be invalidated and cannot be used. 1. Select "Settings" from the Title screen. 2. Select "Save Data Transfer" from the Settings screen. 3. Carefully read the information displayed regarding Save Data Transfer. If you acknowledge the terms, then select "Begin Save Data Transfer" from the Change Device screen. 4. An Inferior treasure being the weakest and Superior treasure being the strongest. Please confirm the onscreen information, and select "Save Data to Server" if you agree to proceed. 5. After confirming that your data has been successfully saved to the server, please record your Transfer Code and Confirmation Code. After double-checking that your codes have been correctly written down, tap the "Close Game" button. * Be aware: If you lose your codes or record one or both codes incorrectly, you will be unable to complete data transfer to your second device. 6. Once the process is finished, confirm the onscreen information once more before exiting the application. 1. Select "Settings" from the Title screen. 2. Select "Save Data Transfer" from the Settings screen. *Image taken from Android version. Menu display may differ slightly on iPhone/iPad screens. 3. After familiarizing yourself with the Save Data Transfer menu, select "Resume Data Transfer". 4. After reading the displayed notice carefully, please input your Transfer Code and Confirmation Code. Once these have been correctly input, tap "Resume Transfer". 5. After a few moments, the Save Data Transfer will complete. You may return to the title once the process has completed. (April 2019) (Learn how and when to remove this template message) 2018 video gameThe Battle CatsThe Battle Cats logoPublisher(s)PONOS CorporationPlatform(s)iOSAndroidNintendo 3DSNintendo SwitchReleaseMobile DevicesSeptember 17, Nintendo SwitchDecember 20, 2018 [1]Genre(s)Tower Defense The Battle Cats (Japanese: にゃんこ大戦争, Hepburn: Nyanko daisensou) is a free-to-play tower defense game developed by the PONOS Corporation for iOS and Android, which was originally released in Japan under the name にゃんこ大戦争 (Nyanko Great War). The Battle Cats debuted on the Japanese iOS App Store in November 2011 under the name of Battle Nekos, with Android support following in December of that same year. It sustained immense popularity in Japan and Korea. It later was deleted in both the US Google Play stores and App Store, with an improved version of the game released on September 17, 2014.[2] A PC port release was available for download until late 2018, when PONOS Corporation cut support for it. Plot The plot in the game is taught through screens of scrolling text, usually appearing at the beginning and end of each "Chapter". Empire of Cats The story of Empire of Cats (commonly shortened to EoC) consists of an army of "Battle Cats" appearing amidst the world's varying crises. The identity of the creator of these Battle Cats is the fictional deity The Cat God,[3] which can be unlocked as a power up early into the story, and beating chapter two of Cats Of The Cosmos unlocks it as a unit. The cats then proceed to take over the world, to harness the world's power. Into the Future The second main story chapter of the game, Into the Future (shortened to ItF)'s story revolves around a time machine the cats obtained in the beginning of Stories of Legend. Using this, they travelled to the future, and find that Aliens have taken over Earth. Battles for the world then commence between the 2 forces. Cats of the Cosmos The current final main chapter of the game, Cats of the Cosmos (often shortened to CotC) begins when interplanetary travel becomes possible. Utilizing this technology, the cats begin to invade outer space, attacking a variety of places in the Cosmos. Gameplay This section does not cite any sources. Please help improve this section by adding citations to reliable sources. Unsourced material may be challenged and removed. (June 2019) (Learn how and when to remove this template message) English screenshot from The Battle Cats gameplay on iOS The Battle Cats is a tower defense game where the player selects a team of in-game unlockable "cats" with different stat amounts to defeat enemies in order to protect their base (called "Cat Base"). The gameplay involves sending a wide roster of cats out onto a 2D battlefield to defend the Cat Base. The enemies may have in-game traits such as 'Red', 'Floating', 'Black', 'Metal', 'Alien', 'Starred Aliens' (which fall under the Alien category), 'Angel', 'Zombie', 'Aku', and 'Relic'. [4]Enemies without a trait are considered 'Traitless' enemies. The Battle Cats contains 3 main story chapters: Empire of Cats (EoC), Into the Future (ItF) and Cats of the Cosmos (CotC).[5]Each main story contains 3 chapters. Additionally, it contains two extra chapters: The Legend Stages and the Catclaw Dojo. The Legend Stages contain multiple stages filled with new enemies and some event stages (including collaborated stages). The Catclaw Dojo contains a stage to test how many enemies you can defeat within a given period of time, with an addition of some collaborated stages of the same premise, except with collaborated enemies. The Legend Stages are further divided into two categories: Stories of Legend (SoL) and Uncanny Legends (UL), with the latter being unlocked after completing the former. There is also an additional category for scheduled and general event stages, and another category for Collaboration stages. The Stories of Legends take place within the same dimension of the three previous Stories, except it was back in time; before the Legends/Legend Cats were sealed.[6]Uncanny Legends takes place even before Stories of Legend timeline wise, with some of the Legend cats you get from this chapter being indicated to be the ancestors of some Stories of Legend cats. The cats are the protagonists that the player deploys throughout the game. The cats are all unique in their own sense, design, and ability. Many cats may not look like or be a typical cat (and are sometimes equipped with external objects such as weapons or machines) or are characters earned in collaboration with other games. Almost all units in the game have a distinctive cat face, cat or cat shaped object/being somewhere on their sprite. Cats have level caps, and reaching one of these means one will not be able to upgrade that cat further. The level caps differ from rarity to rarity and unit to unit. All cats can be upgraded to a maximum level of lv50, with the exception of the "Legend cats" obtained from Stories of legends stages and Uncanny Legends stages, which can only be upgraded to lv40 at maximum. Double-ups obtained on[7] Gacha can be used to add additional "plus levels" to a cat unit.[8]"Catseyes" can also be used to increase the level cap of some units. The cats are divided into six categories:[9] Basic, Special, Rare, Super Rare, Uber Super Rare (commonly shortened to Uber Rare or just Uber), and Legend Rare (??? Rare you unlock one). The Battle Cats frequently has collaboration events (colloquialised as collabs) where players can earn cats called collaboration units. The nine basic cats are the first cats available and are the easiest to upgrade. They have a max upgrade level of 20 but can be increased with Cat Capsule duplicates. After upgrading to level 30 with "Plus levels", the player can evolve the cat into what is called its True Form. Later on in the game, a 10th Basic cat is unlocked, titled "Superfeline". It can be unlocked via the Cat Capsule+ after beating the 3rd story chapter of "Cats of the Cosmos".[10]True Forms for other units are obtained by having the required "Catfruit/behemoth stones" from 11.5 and XP and having them on a certain level. The Special Cats are the second type of unit unlocked. They can be unlocked by drop rewards of certain stages, be bought by cat food (the premium currency of the game), or just by simply collecting the unit by opening the game at certain times.[11]The Rare, Super Rare, Uber Super Rare and ??? Rare (Legend Rare) cats can be unlocked with a rare cat capsule, which requires golden or platinum tickets to operate or to be unlocked in special stages. They are more expensive to upgrade than basic cats and most special cats, but are usually stronger than the basic cats (not to mention "crazed" cats and "manic" cats,[12] the latter being the true forms of the crazed cats), which are buffed versions of the basic cats in the Super Rare Tier, which can be unlocked in special levels in the Legend stages chapter category. Fighting in battle requires "energy", which slowly regenerates overtime. Every one minute, one energy is recovered (the energy recovery rate can be sped up with treasures, up to 1 energy every 30 seconds). The app requires an internet connection in order for energy to update, but if the app has already been opened, the energy amount increases without internet. Max energy can be raised with upgrades and treasures. The player can bring items into the battle that assist such as "Sniper the Cat," a tool that pushes enemies back from the base and deals small damage, and "Cat CPU," a tool that automatically deploys specific cats as soon as money is available, and so on. Some of the stages have special restrictions such as "Special and Rare Cats only."(That mostly applying to "4 crown" stages, formerly known as "4 star stages")[13][14]The battle takes place on a 2D plane with the player's base on the right, and the enemy base on the left. The player gains a continuous stream of money, which can be spent to either deploy cats or to upgrade the money production speed along with the maximum amount of money you can receive in a game. Deploying cats requires a cooldown, which can be specified and "Cat Combos".[15] The battle ends when one of the bases is destroyed. Winning the battle in the main story chapters (1-9) gives the player a chance to get a treasure. Collecting all of them can buff cats' abilities and can also enhance other game mechanics, such as decreased energy recharge time. There are three levels of treasure: Inferior, Normal, and Superior, with an Inferior treasure being the weakest and Superior treasure being the strongest. [16]Players can replay stages to get all the treasures. Players can also use a Treasure Radar powerup to have a 100% chance to get a superior treasure if they complete the battle. The treasure radar can also be used to get a reward in certain stages such as a true form or new unit. There is a huge roster of enemies all of different stats and types, with more being added with each new update. Gamatoto Expedition Gamatoto is an expedition minigame where the player sends out servant cats to search for different resources such as XP, Cat Food and items which can be used in the battle for various purposes, like the Cat jobs, which increases the amount of XP you receive in a stage by 1.5 times.[17] There are 5 levels of Gamatoto helpers that each give a boost to item drop rates, and can be identified by the color of their hats, with white being the lowest and the color of the fixed rare crystals being the best (although you do have to obtain 10 golden helpers to get one). Cat Capsule is a simple infinite platformer similar to Flappy Bird. The player directs a cat riding a pogo stick to gain as much distance as possible, collecting items like gems. For players that have The Battle Cats downloaded, they can complete certain missions in-game for rewards redeemable in The Battle Cats.[25] Battle Cats Quest On November 14, 2021, PONOS Corp released Battle Cats Quest. In this game, players roll a spherical cat on land to knock off enemies from various stages and earn coins. Similarly to Go! Go! Pogo Cat, players can complete in-game missions for rewards redeemable in The Battle Cats.[26] References ^ Romano, Sal (12 December 2018). "Together! The Battle Cats debut trailer". Gematsu.
